In-class Quiz 1 (practice)

CSCI040, Computing for the Web

Total Score:	/10
--------------	-----

Name:
$$(5pt)$$

Problem 1. (1pt) What does the following expression evaluate to?

$$2//3*4+5$$

Problem 2. (1pt) What does the following expression evaluate to?

$$2**3\%4-5$$

Problem 3. (1pt) What is the output of the following code:

$$\begin{array}{ccc} \textbf{for} & i & \textbf{in} & \textbf{range} \, (\, -3 \, ,6 \, ,3 \,)\colon \\ & & \textbf{print} \, (\, \, \dot{} \, i=^{\, \prime} \, ,i \,) \end{array}$$

Problem 4. (1pt) What is the output of the following code:

Problem 5. (1pt) What is the output of the following code:

```
total=0
for i in range(10):
    if i%3==0:
        total+=1
    else:
        total-=1
print('total=',total)
```
